

# DRIVE-IN CINEMA

AUDIO Solution

# STARRING ...

## FALCON

TRANSMITTER

Falcon transmitters deliver HD stereo sound to an unlimited amount of receivers.

Sound: Stereo, HD, SD  
Operational Distance: <300m  
Modulation: FM  
Frequency Response: 30 - 15,000Hz  
Power: Mains / Battery  
Battery Life: <5 hours

## NED

RECEIVER

The small 8.5cm body means the Ned is one of the smallest wireless audio receivers on the market.

Sound: Stereo  
Operational Distance: <200m  
Modulation: FM/UHF  
Frequency Response: 30 - 15,000Hz  
Power: Battery  
Battery Life: <10 hours

## BRYAN

PORTABLE SPEAKER

Despite its size, Bryan has an output power of 5 watts - more than enough to fill your car with all the action.

Sound: Mono  
Output Power: 5w  
Input: 3.5mm Jack  
Power: Battery  
Battery Life: <20 hours

## ALSO STARRING... JACK 3.5MM CABLE

**ACTION!**

**1.** SET UP YOUR TRANSMITTER  
Plug your transmitter into the audio output of the device you're showing your movie on.

**2.** DELIVER AUDIO  
Plug your receiver into your speaker and distribute to each vehicle.
